

## Online High School Survey Results

**Total Number of Responses: 38**

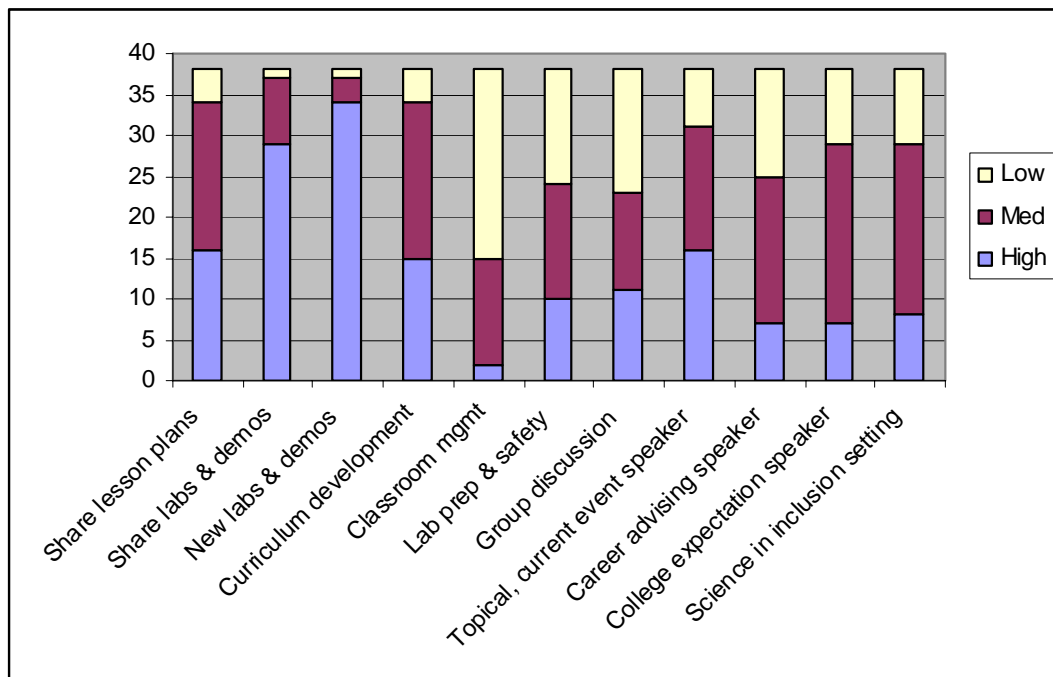

### Results

**1. When would you like professional development seminars held? (check all that you would attend)**

These results tell us that for planning professional development, we need to ensure a variety in scheduling seminars.

**2. Using a High/Medium/Low rating scale, please rate the following professional development topics:**

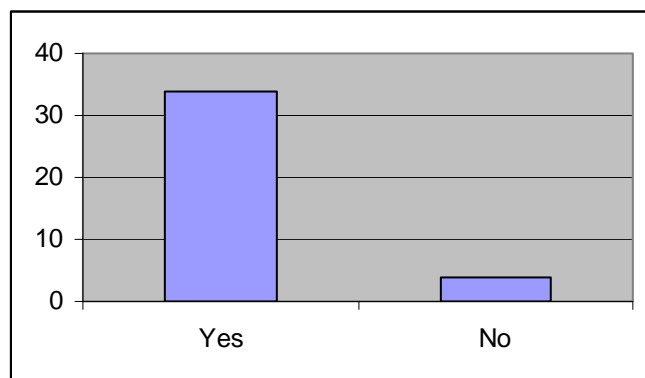

**3. Are there any additional topics that you would benefit from or be interested in?**

1. Science that is relevant and will be used in every day life
2. ACT prep.
3. I think the lab stuff is really important. Most teachers I took classes w/ for the MST weren't trained very well in the lab, so those are top priority and I know I would attend them for sure!
4. Topics that would help our students find jobs in the workplace with an AA degree from CNM. No other place to add this: I wish we as APS high schools could share equipment or have a central loaning library so to speak to share equipment that is used only once a year or so. Also to have a central inventory to purchase chemistry chemicals and supplies that go out of date.
5. Many teachers need to have a refresher on Lab Safety. APS needs to help out here
6. Resources such as videos for students to relate what they are learning to various career opportunities.
7. Specific hands on activities that can be modified for a variety of areas- example the weekend seminars that SEIS offers

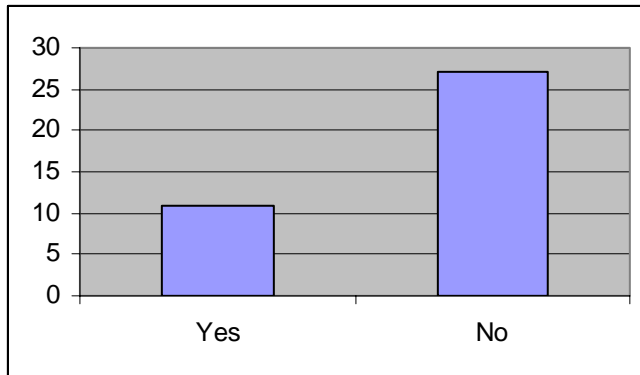

**4. Assuming the seminars were held during the preferred times indicated in question 1, would you attend these professional development seminars?**

100% of respondents said "Yes."

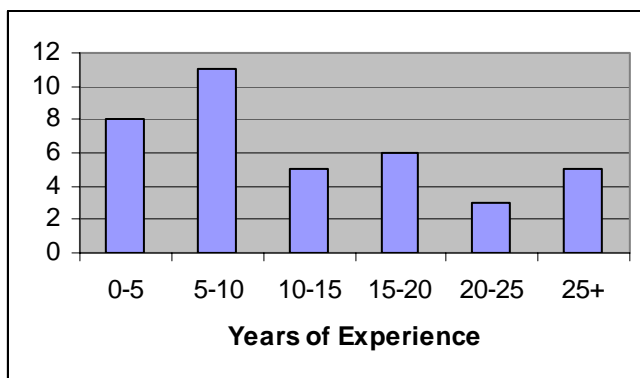

**5. Would you be willing to contribute to these professional development seminars (i.e. sharing lesson plans, labs, etc)?**

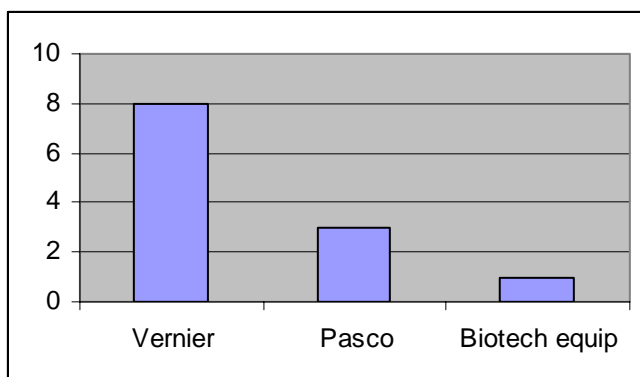

**6. Are you interested in becoming part of a committee to help design and organize professional development seminars?**

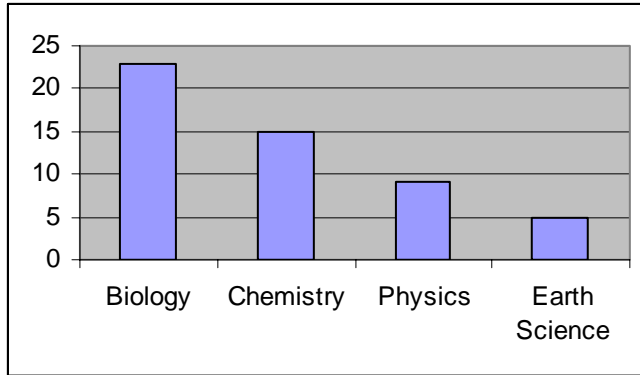

**7. How long have you been teaching?**

**8. Do you have specialized laboratory equipment?**

**9. What is your teaching specialty? (check all that apply)**

**10. Where are you currently teaching?**

**Other responses:** Belen, St. Pius X, New Futures School, Magdalena, School on Wheels and Evening High School, Juvenile Detention

**Schools not represented:** Del Norte, Eldorado, La Cueva, Rio Grande, Sandia, Valley
